

Gooseneck Extensions for Antennas

Features and Benefits

- Flexible gooseneck for antenna extensions
- Standard Lengths:
 - 9”, 12”, 15”, and 18”
- Custom Lengths Available
- TNC and N-type connectors

Pharad’s *octane*® gooseneck extenders allow for the elevation of antennas above portable radios. The *octane*® gooseneck extenders come in standard lengths and are also available in custom configurations. We offer both TNC and N-type connectors. Standard connector configurations include a male plug connector on the bottom and a female jack connector on the top.
