

# Gooseneck Extensions for Antennas

## Features and Benefits

- Flexible gooseneck for antenna extensions
- Standard Lengths:
  - 9", 12", 15", and 18"
- Custom lengths available
- 50 Watts power handling capability
- TNC and N-type connectors

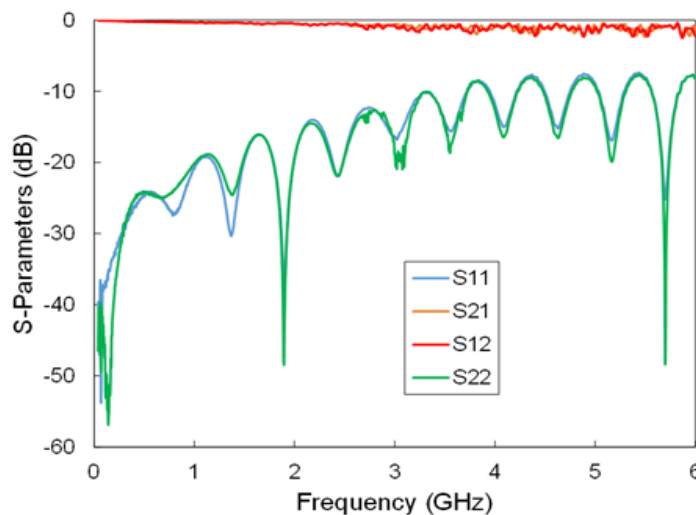

Pharad's *octane*<sup>®</sup> gooseneck extenders allow for the elevation of antennas above portable radios. The *octane*<sup>®</sup> gooseneck extenders are available in standard lengths and also in custom configurations. We offer both TNC and N-type connectors. Standard connector configurations include a male plug connector on one end and a female jack connector on the other.
